WORK EXPERIENCE

Colt Technology Services AI & Data Analysis Intern	June 2025 - September 2025
- Conducted manual and regression testing across 20+ test cases for a sales capacity check website, documenting 50+ defects in Excel and collaborating with cross-functional teams through Agile development cycles. - Designed a network visualization tool using CytoscapeJS, Django, and Oracle DB, implementing 10+ endpoints, role-based access, graph filtering, and node-editing capabilities to improve network analysis and management. - Built 2 AI-powered applications for audio translation and call summarization using OpenAI Whisper, Helsinki-NLP, and BART, developing interactive Gradio interfaces and processing 100+ call samples for mechanized speech translation and summarization.	
Network 18 Media and Investments Limited Strategy & Research Analysis Intern	June 2024 - November 2024
- Designed responsive, interactive translation app using Python, and enhanced accessibility and user experience by 10%, leading to increased user engagement. - Spearheaded cross-functional collaboration across a 5-member team, ensuring seamless integration and 100% on-time delivery of high-quality app projects. - Optimized app design and functionality, resulting in a 10% increase in user engagement, and ensuring a seamless journey while using the app.	

EDUCATION

ITM Skills University	B.Tech, Computer Science, Kharghar, Navi Mumbai	Present
Delhi Public School	HSC, Panvel, Maharashtra	May 2021 — May 2023
Delhi Public School	SSC, Panvel, Maharashtra	May 2016 — May 2020

PROJECTS

API Observability Platform - GitHub Repository	June 2026
- Developed a full-stack API observability platform monitoring 50+ API endpoints across health, latency, error rates, throughput, and availability through centralized dashboards. - Implemented real-time request tracking and performance analytics to identify slow endpoints, elevated error rates, and API reliability issues, enabling endpoint-level troubleshooting. - Engineered automated anomaly detection and AI-powered root-cause analysis to identify unusual API behavior and generate actionable recommendations for improving system reliability and performance.	
Onboarding Intelligence Platform - Github Repository	July 2026
- Architected a full-stack customer onboarding analytics platform analyzing 1,000+ customer records across 5+ onboarding stages, with interactive funnel, cohort, and user-journey visualizations to identify customer drop-off patterns. - Implemented a machine-learning-based drop-off prediction system achieving 75% accuracy, identifying high-risk users and behavioral patterns associated with onboarding conversion and retention. - Integrated AI-powered root-cause analysis and recommendations using Google Gemini API, generating computerized explanations and actionable strategies to improve conversion, activation, and retention.	

ACCOMPLISHMENT

- 5 star Coder on [HackerRank](#)
- Solved 900+ problems on [LeetCode](#)
- Participated in the East/West Regional Semi-Finals of the National Coding League '24 organised by Scaler School of Technology.
